“To serve our patients and community, positively shaping the future of healthcare through outstanding teaching, discovery, and innovation in Family Medicine” is the mission of the Department of Community Health and Family Medicine at the University of Florida. We seek to provide the highest quality of care to the diverse patient population we serve and educate learners of all types and levels. We actively study, critically review and research our efforts in these activities to ensure we are providing high quality medical education in an environment that fosters the highest quality patient care.

The strength of our department shows through our people. Our 59 faculty, nurses, and staff members provided patient care, with over 190,000 outpatient encounters and more than 2,000 hospital admissions, taught medical students in all years, and trained family medicine residents and primary care sports medicine fellows. Our department members are involved in expanding the scholarly foundation for Family Medicine through active participation in research studies and quality improvement projects. We are involved in a wide range of activities throughout the Gainesville community and provide leadership in many important areas for patient care and education.

As a proud and active member of the Gator Nation, our department serves as the interface between our community and the outstanding academic health center. I appreciate your interest in reading our annual report and in the Department of Community Health and Family Medicine at the University of Florida.

We look forward to another exceptional year for our department and to continue serving our patients and learners.

Respectfully,

Peter J. Carek, MD, MS, CAQSM
Professor and Chairman
C. Sue and Louis C. Murray, M.D. Professor in Family Medicine
Our Mission:
To serve our patients and community, positively shaping the future of health care through outstanding teaching, discovery and innovation in family medicine.

Our Vision:
To be a nationally recognized model department of family medicine.
NEW FACULTY AND PROVIDERS

DANIELLE CHAPLIN, ARNP
NURSE PRACTITIONER
HAILE PLANTATION

Ms. Danielle Chaplin is a Family Nurse Practitioner at UF Health Family Medicine - Haile Plantation. She received her bachelor’s degree in nursing from the University of Florida and began practicing as an ICU nurse in 2010. She returned to the University of Florida and received doctoral training in Advanced Practice Nursing in 2014 as a family nurse practitioner. Danielle worked in private practice providing family medicine prior to joining the Haile Plantation clinic.

HELEN HAGAN, MD
ASSISTANT PROFESSOR
HAMPTON OAKS

Dr. Helen Hagan is from Southern California, venturing to Iowa for college at Grinnell and joining the Navy for medical school. During her time in the Navy, she enjoyed providing Primary Care as a Flight Surgeon in Florida, North Carolina, and San Diego. Following these adventures, she completed her Family Medicine Residency in Minneapolis, Minnesota. She then practiced in Beaufort, South Carolina and returned to Florida to practice with the Department of Community Health and Family Medicine at the University of Florida. She is a former ice skater and enjoys outdoor pursuits with her three children.

SILVIA HUNKINS, ARNP
NURSE PRACTITIONER
MAIN

Ms. Silvia Hunkins is a Family Nurse Practitioner at UF Health Family Medicine - Main. She received her master’s degree in mental health counseling from Nova Southeastern University and Master of Science in Nursing degree from Chamberlain College of Nursing.

LAURA PERRY, PHD, LMHC
ADJ ASSISTANT PROFESSOR
MENTAL HEALTH COUNSELOR - MAIN

Dr. Laura Perry is a Licensed Mental Health Counselor and Certified Rehabilitation Counselor at UF Health Family Medicine - Main and at other clinics, as needed.

MARIBETH PORTER, MD, MS
ASSISTANT PROFESSOR
MAIN

Dr. Maribeth Porter is from Mississippi and attended Ole Miss. She graduated from the University of Mississippi SOM and completed the Trident/MUSC residency program serving as chief resident in 2012-2013. She then completed an academic generalist fellowship and obtained her Master of Science in Clinical Research degree in 2015. Dr. Porter’s clinical and research interests include global and underserved health, quality improvement and health services research and residency education.
R. WHIT CURRY, JR, MD
PROFESSOR EMERITUS

Dr. Whit Curry, Jr. joined the department as a Clinical Fellow in 1976 and as a faculty member since 1977. He served as Residency Director for ten years prior to being appointed Department Chairman in 1992. He possesses an outstanding record of academic productivity and achievements as noted by his numerous peer-reviewed publications and presentations during meetings of nationally recognized medical organizations. Dr. Curry has served in numerous leadership roles and received a number of awards, including the College of Medicine’s Lifetime Achievement Award. After 22 years, he stepped down from the Chair position in 2013 and retired in June 2016. Dr. Curry continues to teach as Professor Emeritus, giving lectures for the department.

LINDA HENSLEY, MD
CLINICAL ASSISTANT PROFESSOR
LAB DIRECTOR AND MEDICAL DIRECTOR - MAIN

Dr. Linda Hensley joined the department in 2000 and taught and served as a core faculty member of the Family Medicine Residency Program Clinic and Medical Director for the Family Medicine at Main Street office. Dr. Hensley is a four-time recipient of the College of Medicine Exemplary Teacher Award and the College of Medicine’s Thorkild W. Anderson Award. Dr. Hensley retired after sixteen years of service in June 2016.

LARRY G. ROOKS, MD
ASSOCIATE PROFESSOR EMERITUS

Dr. Larry Rooks joined the Department as a resident in 1979 and as a faculty member in 1982. He served as clinic Medical Director, Director of the Rural Health program, Medical Director for the North Florida AHEC Program, and Co-Director of Undergraduate Education. He has also served as the Chair of the College of Medicine Curriculum Committee and Director of the Family Medicine and Ambulatory Care Clerkship. He has been the recipient of numerous awards for his excellent teaching skills including the Society of Teaching Scholars Lifetime Achievement Award.

Dr. Rooks has contributed to the development and implementation of several educational experiences that have become integrated into the curriculum of the College of Medicine. He created the first year primary care clerkship in the College of Medicine. The University of Florida was the first medical school to implement this educational experience for medical students and this model has been replicated in numerous other medical schools. This preceptorship has been one of the College’s highest rated first-year courses for 20 years. He retired from his academic position in June 2016 after serving 34 years as a core faculty member of Community Health and Family Medicine. Dr. Rooks continues to teach as Associate Professor Emeritus.
CLINICAL SERVICES

FAMILY MEDICINE CLINIC SITES

University of Florida Health Physicians, or UFHP, is responsible for managing the clinical component of the University of Florida College of Medicine, or COM, faculty practice plan. UF Health Family Medicine includes nine clinical locations throughout the Gainesville area. Each clinic has a medical director and an ACU manager who oversees the day-to-day operations of the clinic. In total, we have 59 physicians throughout each of our nine clinics. We have a large, unique and diverse patient population that we are able to serve. This year, CHFM providers had over 190,854 patient encounters.
PATIENT CARE

1. UF Health Family Medicine - Eastside

UF Health Family Medicine - Eastside is a full-service health care resource for children, adults and families. Providers at Eastside offer patients of all ages a wide range of services including physical check-ups and immunizations, health screenings, treatment for various ailments, health care advice and education, pharmacy assistance programs and linkage with community resources. The staff includes four physicians, one pediatrician, one pediatric nurse practitioner, one pharmacist, one social work associate and one RN Health Coach.

Medical director: Elvira Mercado, MD
Physicians and providers: Peter Carek, MD, MS, CAQSM; Martha Green, MD; Elvira Mercado, MD; Kim Nguyen, MD; Paul Psychas, MD; Jason Powell, PharmD; Karen Theoktisto, DNP, ARNP; Lindsay Novak, PA
Nursing staff: Reathea Felder, RN; Yata Armstrong, LPN; Christy Brannin, LPN; Cherie Kirkland, LPN; Victoria Paras, LPN; Rick Sterling, LPN; Gerard Williams, LPN
ACU manager: Tawana Brown
2. **UF Health Family Medicine - Haile Plantation**

UF Health Family Medicine - Haile Plantation provides a wide variety of services, including, but not limited to immunizations, treatment of chronic and acute illnesses, minor surgery, gynecology, dermatology, health maintenance, cryosurgery and skin care. As Haile continues to grow to meet the needs of the community, UF Health Physicians was pleased to announce the opening of a new Haile facility. In 2014, UF Health broke ground with the new location just a mile up the road in Haile. The new location features 24 exam rooms, nearly double the number of exam rooms; 10,987 square-feet of building space; and will hire additional Family Medicine physicians to better serve patients.

**Medical director:** Michael McTiernan, MD  
**Physicians and providers:** Carmen Bray, MD; Philippa Bright, MD; Lucia Hansen, MD; Volha Ihnatsenka, MD; Mitul Jones, MD; Michael McTiernan, MD; Daniel Rubin, MD; Danielle Chaplin, ARNP; Samantha Holtzman, PA-C  
**Nursing staff:** Yolanda Anderson, LPN; Rhonda Bosch, LPN; Shannon Brown, Lead LPN; Kayla Hewlett, LPN; Anne Holsey, LPN; Heather Misedec, LPN; Michaele Schauer, LPN; Lara Smith, LPN; Jini Walker, LPN  
**ACU manager:** Kimberly Mann
3. **UF Health Family Medicine - Hampton Oaks**

UF Health Family Medicine - Hampton Oaks offers comprehensive care for patients ranging from children to geriatrics. The medical staff includes seven physicians who are all board certified and one clinical psychologist. Besides routine and preventive healthcare, our physicians treat many conditions including diabetes mellitus, hypertension, hypercholesterolemia, coronary artery disease, osteoarthritis, osteoporosis, thyroid problems, menopausal issues, asthma, other pulmonary issues, allergies and more. Our physicians also have various areas of special interests, such as women’s and men’s health, adolescent health, complementary/alternative medical treatments, acupuncture, minor procedures, chronic pain conditions and more, making it a very diverse and dynamic team.

**Medical director:** Siegfried Schmidt, MD, PhD  
**Physicians and providers:** Ku-Lang Chang, MD; R. Whit Curry, Jr., MD; Helen Hagan, MD; Maria Elisa Lupi, MD; Frank Orlando, MD; Siegfried Schmidt, MD, PhD; Kristy Breuhl Smith, MD; Petra Townsend, MD; Charles Byrd, PhD  
**Nursing staff:** Sonji Bennett, LPN; Reva High, LPN; Lila Greenfield, LPN; Jody Petroski, LPN; Tamara Jones, LPN; Donna Beverly, LPN  
**ACU manager:** Ashley Pankey
4. **UF Health Family Medicine - Jonesville**

UF Health Family Medicine - Jonesville provides a wide variety of services, including but not limited to treatment of chronic and acute illnesses, minor surgery, gynecology, dermatology, health maintenance, cryosurgery, colposcopy, skin care, and immunizations. Physicians at Jonesville are happy to serve not only the Gainesville and Jonesville community, but also the surrounding areas such as: Newberry, Archer, Williston, Bronson, High Springs, Alachua, Fort White, Lake City and Ocala. The clinic completed their 3-year ramp-up period in November 2015 with notable growth achieved during that time.

*Medical director:* Alpa Desai, DO  
*Physicians and providers:* Alpa Desai, DO; Run Gan, MD; Althea Tyndall-Smith, MD, MS  
*Nursing Staff:* Lacondrea Bethea, CMA; Melanie McCray, LPN; Latasha Forrest-Wilcox, LPN  
*ACU manager:* Amanda Brown
5. **UF Health Family Medicine - Main**

UF Health Family Medicine – Main’s residency program was instituted in 1973 and over 287 residents have graduated and attained board certification since the program’s inception. Residents are trained to deliver competent and compassionate health care services to all segments of the community, from birth to elder care, in both inpatient and outpatient settings.

**Medical director:** Linda Hensley, MD  
**Residency program director:** Karen Hall, MD  
**Physicians and providers:** Tanya Anim, MD; David Feller, MD; Karen Hall, MD; Linda Hensley, MD; John Malaty, MD; Charlie Michaudet, MD, CAQSM; David Quillen, MD; George Samraj, MD; Michael Ware, MD; Eric Dietrich, PharmD; John Gums, PharmD; Lesa Gilbert, ARNP; Thomas Ward, LCSW  
**Nursing Staff:** Ladona Mordecai, RN; Mary Anderson, LPN; Mae Borders, LPN; Tonia Garver, LPN; C Ron Jenkins, LPN; Arifah Reese, LPN; Cassandra Davis, MA; Muriel Flanders, MA; Dyan Krahn, Rad Tech/MA; Amanda Lairson, MA; Jon Bryan, Med Tech; Rebecca Johnson, Med Tech  
**ACU manager:** Mindy Halbrook
6. **UF Health Family Medicine - Old Town**

UF Health Family Medicine – Old Town is located in Old Town, Florida, which is approximately 45 miles west of Gainesville near the Suwannee River. Physicians at this site provide primary care services to a rural community by offering comprehensive adult and pediatric medical care, treatment for chronic and acute illnesses, minor surgery, cryosurgery, skin care, geriatric care, pharmacy consultations, diabetic education and Coumadin clinic. Old Town provides the high level of care that our rural patients recognize and appreciate while making them feel like family. As an added service for our patients at Old Town, cardiologists from UF Health travel to see patients with more complex cardiovascular disease on a monthly basis.

**Medical director:** Grant Harrell, MD  
**Physicians and providers:** Grant Harrell, MD; Robert Hatch, MD, MPH; Sarah Laibstain, MD; Richard Rathe, MD; Larry Rooks, MD; Tan D. Tran, MD; Andrew Bray, PA-C; Gary Rexroat, PA-C  
**Nursing staff:** Angie White, Lead CMA; Cassie Cabrera, CMA; Megan Hendricks, CMA; Alisha Huggins, CMA; Ellie Jones, CMA; Crystal Miller, CMA; Erica Sheppard, CMA  
**ACU manager:** Gredel Buzbee
7. **Primary Care After Hours**
Serving as a joint venture between the departments of Community Health and Family Medicine and Internal Medicine, UF Health Primary Care After Hours provides an opportunity for patients in our system to access primary care providers after normal business hours.

Due to the popularity of having an after-hours clinic, in September 2014, physicians began seeing patients from 6pm to 9pm Monday through Friday, and 10am to 1pm on Saturdays. Primary Care After Hours had a total of 2,272 visits for the year. Clinic visits have consistently increased despite a limited marketing campaign. The clinic currently sees returning patients from internal UF primary care as well as new primary care patients who cannot wait for the first available new visit with their chosen primary care physician.

**Medical director:** Robert Hatch, MD

**Physicians and providers:** The Primary Care After Hours clinic is staffed by physicians from the Department of Community Health and Family Medicine and the Department of Medicine, on a rotating basis.

**Nursing staff:** The Primary Care After Hours clinic is staffed by nurses from the Department of Community Health and Family Medicine, on a rotating basis.

**ACU manager:** Katrina Williams
8. **Student Health Care Center**
The UF Student Health Care Center has been providing care to students since the institution’s inception in 1906. The mission of SHCC is to help all students achieve maximum physical and emotional health so that they may fully participate in the numerous educational and personal growth opportunities. We strive to become the preferred providers for all students. Some services, programs and clinics include nutritional counseling services, primary care, women’s health, psychiatry services, sexual health services and sports medicine. Through a partnership with the Alachua County Health Department, free STI screening is offered. Student Health also assists the College of Medicine with its role as primary in influenza vaccination of faculty/staff/students. Numerous outreach and campus-coordinated programs continue and the most recent programs added are comprehensive weight management for patients with BMI > 30 and transgender medical services. Outside of its core mission, Student Health has also taken on the role of Occupational Medicine and some Worker’s Compensation services for the University.

**Director:** Guy Nicolette, MD, CAQSM

**Physicians and providers:** Ronald Berry, MD; Jay Clugston, MD, CAQSM; Cynthia Eddleton, MD; Katie Edenfield, MD, CAQSM; Michele Emery, MD; Jocelyn Gravlee, MD, CAQSM; Ann Grooms, MD; Boyd Kellett, MD; Eileen Lauzardo, MD; Charlie Michaudet, MD, CAQSM; Guy Nicolette, MD, CAQSM; Cheree Padilla, MD, CAQSM; Dodi Alexander, ARNP; Ramona Brandon, ARNP; Jennifer Donelan, ARNP; Kirsty Freshwater, ARNP; Sheryl Heinicka, ARNP; Abigail Gabriel, ARNP; Nicole Germain, ARNP; Sue Greishaw, ARNP; Stacey Jackson, ARNP; Susan Nesbit, ARNP; Susan Ryals, ARNP; Ann Zaia, ARNP; Malcolm Hickox, PA-C; Cheri Sellers, PA-C; Melissa Turley, PA-C; Janis Mena, RD
Nursing staff: Roya Barger, RN; Karen Brennan, RN; Araceli (Ari) Chiodo, RN; Debbie Farrar, RN; LaKendra Filer, RN; Karen Fournier, RN; Lillian Hummer, RN; Monifa Madison, RN; Bruce Major, RN; Gwenn Major, RN; Kelly Mitchell, RN; Ken Mize, RN; Louise Okken, RN; Toni Ratliff, RN; Stacy Rider, RN; Karen Williams, RN; Diane Webb, RN; Mike Wuerz, RN

Clinical operations: Toni Ratliff, RN

EDUCATION

Community Health and Family Medicine plays a major role in medical student teaching and maintains a key leadership role in educational policy within the University of Florida College of Medicine. We routinely have one to two medical students rotating throughout each of the clinics every semester. UF Health Family Medicine - Main has medical students and about 30 residents every year.

EDUCATIONAL LEADERSHIP WITHIN THE UNIVERSITY OF FLORIDA COLLEGE OF MEDICINE

The department is proud to have several educational leaders. Daniel Rubin, MD took over the existing first-year preceptorship program in 2012, and expanded it to include additional preceptorships at the end of the first-year and in the middle of second-year. Larry Rooks, MD former chair of the Curriculum Committee, created both the preceptorship course for first years and the Staying Whole in Medicine program for all students. Robert Hatch, MD, MPH is chair of the Clerkship Directors Committee and former chair of the Admissions Committee. Jocelyn Gravlee, MD created the fourth-year Advanced Procedures elective, one of the most popular electives at the University of Florida. Richard Rathe, MD serves as assistant dean for Informatics. David Feller, MD was selected as the first recipient of the Scheveling Professorship of Integrative Medicine in recognition of his expertise and teaching in this area. These physicians and several others from our department have been heavily involved in the college’s efforts to renovate the medical school curriculum.

TEACHING AWARDS

*UF College of Medicine Exemplary Teacher Awards, 2015-16:*

- Philippa Bright, MD
- Robert Hatch, MD, MPH
- Shenary Cotter, MD
- Mitul Jones, MD
- Alpa Desai, DO
- John Malaty, MD
- David Feller, MD
- Charlie Michaudet, MD, CAQSM
- Jocelyn Gravlee, MD
- David Quillen, MD
- Helen Hagan, MD
- Richard Rathe, MD
- Lucia Hansen, MD
- Daniel Rubin, MD
- J. Grant Harrell, MD
- Althea Tyndall-Smith, MD, MS

Robert Hatch, MD, MPH received the Ken Kellner, MD, PhD Outstanding Clerkship Director Award by the College of Medicine. Dr. Hatch was presented the award by Kenneth Kellner, MD, PhD at the Sixteenth Annual Celebration of Excellence in Medical Education Reception on March 16, 2016. The event was hosted by the Society of Teaching Scholars in the George T. Harrell, MD Medical Education Building.

REQUIRED FIRST, SECOND AND THIRD-YEAR COURSES THAT CHFM FACULTY TEACH

- Family Medicine and Ambulatory Care Clerkship (Third Year)
- Family Medicine Sub-Internship (Fourth Year)
- Genetics and Health (First Year)
- Geriatrics Clerkship (Fourth Year)
- Foundations of Medicine (First Year)
- Fundamentals of Microbiology and Immunology (First Year)
- Health Outcomes and Policy 1 (First Year)
- Hematology (Second Year)
- Internal Medicine Clerkship (Third Year)
- Introduction to Cancer Biology and Clinical Oncology (First Year)
- Introduction to Clinical Medicine 1-4 (First and Second Year)
- Introduction to Clinical Practice (First Year)
- Pediatrics Clerkship (Third Year)
- Psychiatry Clerkship (Third Year)
- Research and Discovery Foundations in Medicine (First Year)
PRECEPTORSHIP SERIES
Daniel Rubin, MD is the course director of this popular series, which is consistently rated as one of the highlights of the first two years. Students report a higher degree of confidence upon entering third year clerkships after completing the course. The course continues to integrate a spectrum of topics related to community health in its lecture series. It also remains one of the best intensive opportunities for students to be exposed to positive Family Medicine role models early in their education.

REQUIRED FOURTH-YEAR MEDICINE ROTATION
Students can satisfy the fourth-year medicine requirement by spending four weeks on the family medicine inpatient service. All slots are filled early in the process. Students have responded well to the changes that were implemented to produce a more consistent and rigorous experience.

COURSE DIRECTORS AND STAFF
Robert Hatch, MD, MPH: Family Medicine and Ambulatory Care Clerkship
David Feller, MD: Required Fourth-Year Medicine/Family Medicine Option
Jocelyn Gravlee, MD: Common and Advanced Procedures
Daniel Rubin, MD: Preceptorship Series
William Allen, JD, MDiv: Advanced Issues in Medical Ethics and Law; Financial, Business and Health Systems Aspects of Medicine; and Research and Discovery Foundations of Medicine
Maria Bolanos: Academic Assistant for Family Medicine and Ambulatory Care Clerkship
EDUCATION ACTIVIES

The Program in Bioethics, Law and Medical Professionalism (BLMP) faculty teaches ethics and professionalism to medical students throughout all four years of their education, as well as to residents and fellows in various departments, including CHFM. The BLMP faculty also teach in the Putting Families First: Interdisciplinary Family Health course.

The education the BLMP faculty provide for medical students is integrated into all four years of undergraduate medical education at UF in the “thread” called Ethics, Law, and Professionalism. The BLMP faculty taught first- and second-year medical students during both the fall and spring semesters of the 2015-2016 academic year through lectures and active learning activities, with much of the active learning take place in the students’ Collaborative Learning Groups (CLGs). Additionally, BLMP faculty taught medical students in workshops and case conferences in the Family Medicine/Ambulatory Care Clerkship, Pediatrics Clerkship and Psychiatry Clerkship.

Professor Lauren Solberg assumed directorship of BLMP in November 2015. Under her leadership, the program has expanded BLMP’s educational offerings into the Geriatrics Clerkship, which all medical students are required to complete in their fourth year. Other important program accomplishments include the updating of teaching activities in the curriculum for first- and second-year medical students and the initiation of the Advance Directives Training Project for quality improvement and education in CHFM.

Professor Bill Allen provided research ethics training for graduate students in the College of Medicine Interdisciplinary Ph.D. program, the Advanced Postgraduate Program in Clinical Investigation, the Genetics Institute, and other programs throughout the Health Science Center. He served as course director for “Pharmacy Law and Ethics,” taught to College of Pharmacy students, and for “Research and Discovery Foundations in Medicine,” a required course for first-year medical students.

Dr. Ray Moseley co-directed with Professor Allen a highly-enrolled fourth-year elective for medical students called “Financial, Business, and Health Systems Aspects of Medicine”. Dr. Moseley also facilitates ethics workshops for Internal Medicine residents on a monthly basis.

This year, Dr. Moseley worked with leaders of sister institutions and the Florida Bioethics Network, for which he was a co-founder and is a current board member, to organize the Taking Informed Consent Seriously conference, held on April 29, 2016 in Maitland, Florida. The conference featured a series of talks and panel discussions that emphasized the ethical importance of informed consent and provided attendees with useful strategies for their implementation in both the clinical and research settings.

ADVANCE DIRECTIVES EDUCATION FOR CHFM

The team of BLMP faculty offered their expertise to all faculty and staff members at each CHFM clinic through the Advance Directives Training Project (ADTP). During sessions offered to each clinic, BLMP faculty educated physicians, nurses, medical assistants, financial representatives and others about the importance of advance directives and explained the need for clinic-specific protocols to ensure conversations about advance directives occur for each patient. The ADTP will continue into the upcoming academic year with more training sessions, data gathering and quality improvement activities.
BLMP faculty members continued to serve on the UF Health Ethics Committee during the 2015-2016 academic year. Professors Allen, Moseley and Solberg performed ethics consultations for providers and patients at the UF Health Shands Hospital, providing the majority of the staffing for this service. This service is a critical one for the hospital and outpatient clinics, providing both individual and team-based consultation for a variety of issues such as capacity concerns, plan of care conflicts, end of life care planning and advance directives, informed consent questions, confidentiality concerns and appointment of social worker proxies, among other issues.

Ray Moseley, PhD
Bernie Amaro, CPC-A, Academic Assistant
RESIDENT EDUCATION PROGRAM

MISSION
The University of Florida Family Medicine Residency program trains residents to be competent, compassionate, ethical and professional physicians who provide comprehensive care to patients in a continuity of care model. Emphasis is placed on practical and direct patient care-based training in addition to didactic teaching that enhances the learning environment. The program is also committed to supporting each resident in his or her educational endeavors, whether the resident selects a clinical path or moves on to a fellowship, academic medicine or research. New initiatives in the program include emphasis on high quality care and patient safety, as well as enhanced academic and research opportunities. The mission is to instill in residents the love of lifelong learning by providing the framework and tools to ensure success in the long-term art and practice of medicine.

PROGRAM PROFILE
The University of Florida Family Medicine Residency program has made a significant impact on the care provided to patients in Alachua County and northern Florida since 1973. Since then, 287 graduates have entered the family physician workforce as providers of comprehensive medical care, academics and providers of specialty care in geriatrics, emergency medicine, hospital-based medicine and sports medicine.

CURRENT ACTIVITIES AND HIGHLIGHTS FOR 2015-2016
The University of Florida Family Medicine Residency program has achieved recognition as a Patient-Centered Medical Home. We continue to work toward team-based care and plan to reconfigure our office in four teams mentored by faculty and led by senior residents.

We continue our ongoing efforts toward multi-level resident quality improvement projects. The three teams were facilitated by Peter Carek, MD, MS, CAQSM; Maribeth Porter, MD, MS; and John Malaty, MD and included projects on Dexa Scan for Detection of Osteoporosis, Preventative Health Smart Sets and Primary Care Management of Chronic Kidney Disease (CKD). Going forward, quality initiatives will be reassigned to new teams. The program also conducts physicals for high school athletes, the Special Olympics and Pop Warner Little Scholars and provides educational support for local schools in health, tobacco avoidance and lifestyle education.

The program’s attention to enhancing scholarly activity paid off well over the year. Residents traveled to national sports medicine meetings and presented posters while faculty and residents presented at the national Society of Teachers of Family Medicine conference held this year.

As new interns were welcomed, the class of 2016 graduated. Eight of eleven graduates will be staying in Florida. The 2016 graduates continued the trend of 100 percent board certification, which marks four consecutive years of 100 percent pass rate. Additionally, the In-Training Exam scores improved and exceeded national means.

Residency program director: Karen Hall, MD
Core Faculty: Tanya Anim, MD; David Feller, MD; Karen Hall, MD; Linda Hensley, MD; John Malaty, MD; Charlie Michaudet, MD, CAQSM; George Samraj, MD;

Whit Curry, Jr, MD; Run Gan, MD; Helen Hagan, MD; Lucia Hansen, MD; Robert Hatch, MD, MPH; Mitul Jones, MD; Michael McTiernan, MD; Elvira Mercado, MD; Maribeth Porter, MD, MS; David Quillen, MD; Siegfried Schmidt, MD, PhD;
BEHAVIORAL MEDICINE

The Behavioral Medicine faculty and staff participate in projects and activities involving all major missions of the department and the UF College of Medicine, including teaching and administrative activities, direct patient care services and consultation and research and scholarly activities.

In terms of educational programs, the Behavioral Medicine faculty undertake the development and implementation of medical educational programs for family medicine residents, medical students, community practicing physicians and academic physicians. One major focus of the program is on curricula designed to educate medical trainees in various aspects of the biopsychosocial model of care, including home visits and office-based lifestyle modification (e.g., smoking cessation, healthy exercise patterns). Other areas of special emphasis include 360-degree evaluation of resident performance, including physician-patient communication skills and professionalism. The Behavioral Medicine program is an integral part of the clinical mission of the department. The faculty and staff of the program provide psychotherapy and evaluation services to patients referred by the physician faculty of the department and by the family medicine residents. In addition, the Behavioral Medicine faculty often combine clinical care and resident educational activities.

MEDICAL STUDENT CURRICULUM

The Behavioral Medicine faculty are involved in teaching activities for medical students during their first, second, third and fourth years of training, including:

- Co-leading small groups during the “Essentials of Patient Care” and “Interdisciplinary Family Health” sections of the medical school curriculum.
- Workshops and lectures on behavioral medicine topics for students during their third and fourth year clerkships.
- Ten to 12 lectures on human behavior and mental health presented as part of the Residency program didactic sessions for third-year Family Medicine and Ambulatory Care clerkship and fourth year required Medicine rotation students.
- Behavioral Medicine program faculty consult and precept third- and fourth-year medical students regarding the social agency needs of patients, the assessment of psychological disorders or family conflict.

CURRENT EDUCATIONAL ACTIVITIES - RESIDENTS

The Behavioral Medicine program’s educational activities for our residents include: Orientation Program, Balint and Support Groups, Faculty Advisor Roles, Resident Evaluation Processes, Third-Year Behavioral Medicine Rotation and Didactic Series.

Faculty: David Feller, MD; Michael Ware, MD; Jenny Land, PhD; Laura Perry, PhD, LMHC; Tom Ward, LCSW

QUALITY AND PATIENT SAFETY

OVERVIEW
The Department of Community Health and Family Medicine continually evaluates current quality indicators and sets new goals as we strive to provide the best patient care possible. Department-wide quality improvement projects, which plan to focus on chronic conditions such as diabetes mellitus and preventive services such as influenza and pneumococcal vaccination and smoking cessation, have been initiated at each individual clinic site. These projects will be tailored to each clinic’s unique patient population and be overseen by the medical director. The dedication of the faculty and staff at each of our clinics is the driving force behind offering our patients the very best care available.

PATIENT-CENTERED MEDICAL HOME RECOGNITION
All clinics in our department are recognized by the National Committee for Quality Assurance, or NCQA, as Level 2 Patient-Centered Medical Homes, or PCMH. Obtaining PCMH recognition on any level requires a significant amount of effort and expertise, with much dedication and coordinated teamwork, in order to transform clinic processes and practices from one of the traditional doctor-centered medical practice to one that is truly patient-centered. PCMH models have been shown to improve patient health outcomes and professional physician satisfaction.

HOSPITAL READMISSION REDUCTION
The Family Medicine service has seen a reduction in their hospital readmission rates. A readmission registry has been created to keep track of patients who were discharged from family medicine practices at UF Health. Using data from the registry, weekly quality improvement rounds are conducted with the inpatient team and readmission risk factors for specific patients are reviewed and addressed. This weekly retrospective readmission root-cause analysis that highlights high-risk patients, conducted by the inpatient team (residents, attending, case manager), began December 1, 2014, as part of the Resident Safety and Quality Rounds. As a result of this activity, CHFM was the recipient of the 2015 Family Practice Management Award for Practice Improvement sponsored by the Society of the Teachers of Family Medicine and the American Academy of Family Physicians.

QUALITY IMPROVEMENT ACTIVITIES
CHFM was honored in December 2015 as the recipient of the Society of Teachers of Family Medicine Family Practice Management Award for Practice Improvement 2015. This award is cosponsored by Family Practice Management and is offered annually to a primary care practice or practice organization that has made significant improvement in one or more of the following in the past three calendar years:

- Clinical outcomes
- Clinical process improvement
- Patient satisfaction
- Staff satisfaction
- Physician satisfaction
- Practice efficiency and productivity

Peter Carek, MD, MS, CAQSM and Paulette Blanc receiving, on behalf of CHFM, the Society of Teachers of Family Medicine Family Practice Management Award for Practice Improvement 2015 at the Society of Teachers of Family Medicine Conference.
Readmissions following hospital discharge are common and used by many individuals as a measure of the quality of care provided. According to the Centers for Medicare Services (CMS), approximately 1 in 5 patients are readmitted to the hospital within 30 days of discharge. The Family Medicine inpatient team at the University of Florida was among the services with the highest readmission rates in the hospital with an average of 23 percent of patients discharged returning to the hospital within 30 days of their discharge.

To address this high rate of readmission, a multidisciplinary team was assembled in the fall of 2014 to implement a High-Risk Patient Discharge Plan Project. This team included family medicine physicians, emergency medicine physicians, pharmacists, nurses, social workers and home health providers. The project team developed and implemented two parallel processes in an effort to reduce the readmission rate: 1) Identification of High-Risk Patients and 2) Implementation of Weekly Readmission Review Quality Rounds.

The readmission rate for the ten weeks prior to the start of our initiative averaged 23 percent. For the 20 weeks following the implementation of this project, the readmission rate of the Family Medicine inpatient service was 18 percent, an absolute reduction of 5 percent and a relative reduction of 22 percent in the readmission rate. This reduction was attributed to the following activities: a multidisciplinary team was organized, the weekly readmission rate was used to monitor progress, the inpatient team met weekly to specifically review patients that were recently readmitted, a group of patients at high risk for readmission were identified and trends in selected aspects of their demographics and care were examined.

Figure. Weekly readmission rate for the inpatient service (control chart with median (solid line) and upper and lower confidence limits (dashed lines)). Arrow denotes initial time of intervention implementation.
Rural Health

ORGANIZATION AND STRUCTURE

UF Health Family Medicine – Old Town continues to see growth in its practice and proves to be a vital role in the Medical Student Education program. The five faculty members who participated in the program this past year include Grant Harrell, MD, Medical Director; Robert Hatch, MD, MPH; Larry Rooks, MD; Sarah Laibstain, MD; and Richard Rathe, MD. Andrew Bray, PA and Gary Rexroat, PA were the two physician assistants at the Old Town clinic. Mr. Rexroat continues to provide care for a large patient population with his style and expertise and has been in practice for over 40 years. Karen Sando, PharmD continues to provide patient care through managing Old Town’s Coumadin clinic, Smoking Cessation clinic and Diabetic Education program.

OBJECTIVES

- To develop and maintain a rural clinical teaching network capable of full implementation of a coordinated departmental curriculum.
- To provide medical students with an opportunity to learn about health care issues specific to an underserved rural community.
- To improve the quality of and access to health care for the rural communities of north Florida.
- To offer cost-effective, comprehensive, longitudinal health care to rural communities in Florida.
- To offer health maintenance and disease prevention programs by means of community education and as a component of clinical practice.
- To develop the rural teaching sites as referral bases for the Family Medicine Residency program and Shands subspecialty care.
- To collaborate with the University of Florida AHEC program including hosting a student from the Rural Scholars program during the summer term.

Equal Access

ABOUT

The Equal Access Clinic was established by a group of dedicated medical students in 1988. The clinic opened its doors in 1992 at a local Salvation Army facility and fortunately was later provided with free access to a University of Florida Family Practice Medical Group facility in Gainesville, Florida. David Feller, MD serves as faculty advisor. Today, the organization is one of the largest and most comprehensive student-run free healthcare clinics in the nation. The clinic provides free healthcare and other services to the medically underserved in Alachua County and its surrounding counties. A diverse group of undergraduate and professional students from the University of Florida partake in volunteer activities at the clinic. The majority of student support is derived from the Colleges of Medicine, Dentistry, Pharmacy and Public Health and Health Professionals.

This year was the most successful year yet for the Equal Access Clinic network. A fantastic relationship was forged with HealthStreet at UF and now have two clinics operating out of their facilities. This has allowed the expansion of the Ophthalmology Clinic and the Mental Health Therapy Clinic. It is expected that this partnership will allow the further expansion of these services for our patients.
Opening the dental clinic in February 2016 was the highlight of the year. We partnered with Gainesville Community Ministries to open a dental clinic which provides fillings and extractions. Demand for the clinic quickly grew and was expanded from once per month to twice per month starting in April 2016. The goal is to build the ability to provide cleaning and preventive services for patients’ dental health. UF Health Family Medicine - Main location continues to be the busiest clinic with up to 20 patients per night. The move to the UF Health Family Medicine - Eastside clinic has expanded the ability to see patients on Tuesday nights.

With the support of the Department of Community Health and Family Medicine and Dr. Ryan Nall, we were able to open a LGBT specific clinic where patients can feel secure addressing their needs. In addition, the administrative staff from the Department of Community Health and Family Medicine provided much needed and appreciated support to the Equal Access Clinic. Faculty from the departments of Family Medicine, Internal Medicine and Emergency Medicine provided the supervision to assess and treat patients at each clinic site.

GOALS

- **Long-term sustainability**: Continued focus on our ability to provide services for the long term with specific interest in establishing a long-term funding source.
- **Physician recruitment**: Have enough providers to keep clinic open all year.
- **Maintain dental clinic**: Expand capacity for preventive dental care in addition to the extraction and filling care we currently provide.
- **Quality improvement and research**: Continue to improve clinic through critical analysis of processes and data driven projects. Specific areas include tracking success of referrals to outside resources, such as WeCare and clinic efficiency.
- **Lab resource efficiency**: Lab work is currently the largest budget item. The goal is to evaluate our lab usage and indications to ensure we are utilizing this resource as efficiently as possible, ensuring we maximize this benefit to our patients.
- **Pharmacy**: We have had huge success in reducing our pharmacy costs over the past two years by being cost conscious and prescribing generics when possible. Our goal is to assess our practices to ensure the quality of care is maintained.
- **Long-term contraception**: Continue to add long-term contraception to the services offered.
- **Spanish services**: Improve our ability to serve Spanish-speaking patients by having all materials available in Spanish, while educating our volunteers on the translation services that are available.
- **Recommended screenings**: Our capacity to connect patients with all recommended health screenings, such as colonoscopies, has waxed and waned over the years. Our goal is to ensure that we are maximizing the community resources available to get these for our patients.

SERVICE HOURS

Annual Volunteering at EAC Medical Clinics

- Physician ................................................................. 800 hours
- Residents ................................................................. 500 hours
- Medical Students (clinical volunteering) ........................ 6,400 hours
- Medical Students (administrative) ........................................... 3,000 hours
- Other Health Professional Students .......................... 4,000 hours
- Undergraduate Students .............................................. 20,000 hours
- Family Medicine Staff, Bus Driver, Social Worker .................... 800 hours

Total hours of service for all volunteers .................................. 35,500 hours

STATE OF THE DEPARTMENT

EVENT
On Friday, September 16, the annual State of the Department address was conducted for all Community Health and Family Medicine faculty, staff and special guests, including Dean, Michael Good, MD. Presentations provided an overview of the activities and accomplishments of our department and faculty members. In particular, our medical and program directors presented accomplishments of their clinics and programs.

PATIENT CARE
- Opened a new facility for UF Health Family Medicine - Haile Plantation
- Increased patient access for daily appointments and patient volume
- Provided additional services to our patients, such as primary care sports medicine and anticoagulation clinic
- Involved in numerous research studies

MEDICAL STUDENT EDUCATION
- College of Medicine Leadership Positions
  - Director of Preceptorships and Third-Year Clerkship
  - Faculty advisor for the Family Medicine Interest Group
- Faculty membership on Curriculum Committee, Admissions Committee

COURSES
- Preceptor Series, Family Medicine/Ambulatory Care Clerkship and 4th-Year Sub Internship

INNOVATION
- Continuity Clinic, Inter-Professional Learning and Students Writing Orders

RESIDENT EDUCATION
- Matched nine first-year resident positions
- 100 percent pass rate on ABFM Certification Examination
- Improved the patient care experience in our family medicine centers
- High volume of patient visits with expanded services
- Implemented additional/focused procedural training
- Team-based care addressing population health as well as care of individual patients
- Expanded opportunities for research and quality improvement
- Improved resident survey results
- Maintained outstanding teaching evaluations

FELLOWSHIP
- Primary Care Sports Medicine Fellowship (in partnership with the Department of Emergency Medicine)
- Worked closely with the University Athletic Association to provide care to UF student-athletes
- Opportunities for resident and student rotations

FACULTY DEVELOPMENT
- Instituted a faculty development series with emphasis on improving scholarship and teaching skills
- Departmental Grand Rounds addressing faculty related matters; additional conferences presenting clinical topics
Our department faculty and staff continue to give their time and talent to serve others. Listed below are the 421 administrative service rolls and committees they serve at a national, regional and local level.

**FACULTY**

**William L. Allen, JD, MDiv**
- **National**
  - Editorial Board Member, Genetic Testing and Molecular Biomarkers
- **Regional/State**
  - Florida CARES Reviewer
- **Local/University**
  - Admissions Committee, College of Medicine, University of Florida
  - Board of Directors, Center for Government Responsibility, University of Florida Levin College of Law
  - Ethics Consultation Service, UF Health Shands Hospital
  - Member, UF Health Shands Hospital Ethics Committee
  - University of Florida Genetics Institute Executive Committee

**Tanya Anim, MD**
- **Local/University**
  - UF College of Medicine Faculty Council
  - UF College of Medicine Graduate Medical Education Committee

**Ronald Berry, MD**
- **Local/University**
  - Chair, University Sick Leave Pool Committee
  - Volunteer Physician, Equal Access Clinic, College of Medicine, University of Florida

**Charles E. Byrd, PhD, MS**
- **Regional/State**
  - Active Member, Medical Reserve Corps, Florida Unit (SERVFL)
  - Executive Board Member, Florida Afterschool Network (FAN), C.S. Mott Foundation
  - Member & Vice Chair, 4-H Youth Development Advisory Council, UF 4-H Program, IFAS

**Peter J. Carek, MD, MS, CAQSM**
- **National**
  - Co-Chair, Group on Research in Residency Training, Society of Teachers of Family Medicine
  - Chair, Review Committee for Family Medicine, Accreditation Council for Graduate Medical Education (ACGME)
  - Deputy Chair, Medical Section, Council of Review Committees, Accreditation Council for Graduate Medical Education (ACGME)
  - Chair, Sports Medicine Milestones Working Group, Accreditation Council for Graduate Medical Education (ACGME)
  - Chair, Council of Review Committee Chairs, Accreditation Council for Graduate Medical Education (ACGME)
  - Member, Board of Directors, Accreditation Council for Graduate Medical Education (ACGME)
  - Member, Executive Committee, Board of Directors, Accreditation Council for Graduate Medical Education (ACGME)
  - Member, Policies and Procedures Committee, Board of Directors, Accreditation Council for Graduate Medical Education (ACGME)
  - Member, Governance Committee, Board of Directors, Accreditation Council for Graduate Medical Education (ACGME)
  - Member, Common Program Requirements Phase I - Fatigue Mitigation, Patient Safety and Professionalism - Task Force, Accreditation Council for Graduate Medical Education (ACGME)
o Participant, Symposium on Physician Well-Being, Accreditation Council for Graduate Medical Education (ACGME)

o Member, Ad Hoc Committee for Addiction Medicine Application, Accreditation Council for Graduate Medical Education (ACGME)

o Member, Task Force on Physician Well-Being, Accreditation Council for Graduate Medicine Education (ACGME)

**Regional/State**

o Member, Residency Director’s Council, Florida Academy of Family Physicians

o Member, Advisory Committee, Florida Blue Center for Health Care Quality

**Local/University**

o Chair, Department of Community Health and Family Medicine, College of Medicine, University of Florida

o Chief of Family Medicine, UF Health Shands Hospital

o Member, UF Health Shands Hospital Medical Staff Quality and Operations Committee

o Member, College of Medicine Executive Committee, University of Florida

o Member, Board of Directors, Florida Clinical Practice Association, Inc.

o Member, Managed Care Strategy Committee, UF Health Physicians College of Medicine, University of Florida

o Member, Implementation Science Operations Committee, College of Medicine, University of Florida

o Member, OneFlorida Steering Committee, University of Florida

o Vice-Chair, Mission Track Promotion Committee, College of Medicine, University of Florida

o Member, Educational Incentive Committee, College of Medicine, University of Florida

o Member, Research Leadership Group, College of Medicine, University of Florida

o Medical Director, ACORN Clinic

o Member, Junior Honors Medical Program Advisory Committee, College of Medicine, University of Florida

o Member, Capital Review Advisory Committee, UF Health, University of Florida

o Member, Readmissions Steering Committee, UF Health, University of Florida

o Mentor, University Minority Mentor Program, University of Florida

o Member, Clinical Information Technology Steering Committee, UF Health

o Member, Steering Committee, OneFlorida Clinical Research Consortium

o Chair, CTSI Translational Pilot Program Steering Committee, University of Florida

o Member, Executive Committee, OneFlorida Clinical Research Consortium

o Member, Patient Satisfaction Survey Steering Committee, University of Florida Physicians

o Member, Public Health External Advisory Committee, College of Public Health and Health Professions, University of Florida

o Member, Efficiency, Effectiveness, and Patient Centeredness, Readmission Steering Committee

o Member, Efficiency, Effectiveness, and Patient Centeredness, Discharge Appointment Scheduling Improvement Committee

o Member, Efficiency, Effectiveness, and Patient Centeredness, Community Engagement Committee

o Volunteer Physician, Equal Access Clinic, College of Medicine, University of Florida

**Lisa Chacko, MD, MPH**

• National

  o Resident Member, Primary Care Leadership + Innovation Academy

• Local/University

  o Resident Member, Patient Safety and Quality Improvement Committee, University of Florida Health System

**Ku-Lang Chang, MD**

• Local/University

  o Billing and Compliance Officer and Director of Compliance (Clinics)

  o Director of Quality and Safety (Clinics)

  o Medical Review Officer, UF Health Shands Hospital

GRANTS

A Randomized Multicountry, Multicenter Double-blind Parallel placebo-controlled Study of the Effects of Atrasentan on Renal Outcomes in Subjects with Type 2 Diabetes and Nephropathy

*AbbVie*

The purpose of this study is to evaluate whether or not Atrasentan is effective in delaying the time to serum creatinine doubling or the onset of End Stage Renal Disease in subjects with Type 2 Diabetes Mellitus and Kidney Disease. In addition, this study will compare Atrasentan with a placebo to see if taking Atrasentan is better than taking a placebo.

- CHFM primary investigator: Karen Hall, MD
- CHFM total grant: $36,249.96.00

An Interactive Patient-Centered Consent for Use in Research with Electronic Medical Records

*National Institutes of Health (NIH)*

The goal of this project is to develop and evaluate a novel, electronic informed consent application for research involving electronic health record (EHR) data. In response to NIH RFA-OD-15-002, this study addresses research using clinical records and data, including the issues of the appropriate content and duration of informed consent and patient preferences about research use of clinical information. First, this study will design an electronic consent application intended to improve patients’ satisfaction with and understanding of consent for research using their EHR data. The electronic application will provide interactive functionality that creates a virtual, patient-centered discussion with patients about research that uses EHR data.

- CHFM investigators: Ray Moseley, PhD and Arch Mainous, III, PhD
- CHFM total grant: $534,877.23

Cardiovascular Screening with History, Physical, ECG and Echo in College Athletes. 5-Year Results from Two Division I Institutions

*American Medical Society for Sports Medicine Foundation Research Grant (AMSSM)*

The purpose of this study is to investigate the results of comprehensive cardiac screening done at the University of Florida and the University of Georgia from 2011 to 2016. The primary objective of the study is to determine the sensitivity, specificity, positive and negative predictive value of history, physical, ECG and echo for cardiovascular screening for detection of cardiovascular conditions. Secondary objectives are: 1) to determine high risk groups stratified by sport, gender and race/ethnicity, 2) to report echocardiographic norms in college athletes, and 3) To report any complications or morbidity caused by secondary investigations or treatments.

- CHFM primary investigator: Katherine M. Edenfield, MD, CAQSM
- CHFM total grant: $10,448.00
Characterizing the Complications Associated with Therapeutic Blood Transfusions for Hemoglobinopathies

**Centers for Disease Control and Prevention**
The goal of this project is to develop and implement a clinical decision support system into the electronic health record for sickle cell disease and other hemoglobinopathies using expertise on treatment and complications of hemoglobinopathies. Using appropriate algorithms in the clinical decision support system, the implementation of this system within the electronic medical record would allow for more focused and appropriate care delivered in the Department of Community Health and Family Medicine with trigger prompts and education for the primary care physicians to best evaluate appropriate management and quality of care of patients with sickle cell disease and other hemoglobinopathies.

- CHFM investigators: Arch Mainous, III, PhD and Peter Carek, MD, MS, CAQSM
- CHFM total grant: $8,077.00

Co-Investigator advising the Implementation Science Program to look at adapting interventions into clinical settings.

**Implementation Science Grant**
- CHFM primary investigator: Maribeth Porter, MD, MS
- CHFM total grant: $25,500.00

**DoD/NCAA Grand Alliance: Concussion Assessment, Research and Education (CARE) Consortium**

**Department of Defense (DoD) / National Collegiate Athletic Association (NCAA)**
A prospective, longitudinal, multi-center, multi-sport investigation that delineates the natural history of concussion in both men and women by incorporating a multi-dimensional assessment of standardized clinical measures of post-concussive symptomatology, performance-based testing (cognitive function, postural stability), and psychological health.

- CHFM primary investigator: James R. Clugston, MD, CAQSM
- CHFM total grant: $436,700.00

**Dose-Finding of Semaglutide Administered Subcutaneously Once Daily Versus Placebo and Liraglutide in Subjects with Type 2 Diabetes Subtitle: A 26-Week, Multicentre, Double-Blind, Randomised, Controlled Dose-Finding Trial, Phase 2**

**Novo Nordisk**
This was a 26-week multicenter, randomized, double-blinded, dose-finding trial comparing four dose levels of semaglutide administered s.c. OD to four dose levels of placebo and liraglutide in 704 subjects diagnosed with type 2 diabetes mellitus (T2DM) treated with diet and exercise with or without metformin. The treatment period is 26 weeks in total followed by a follow-up visit after 7 weeks. Total trial duration for the individual subjects will be up to 36 weeks. To compare the efficacy of four (4) dose-levels of semaglutide administered subcutaneously (s.c.) once daily (OD) versus placebo on glycemic control after 26 weeks of treatment, 2) to compare the efficacy of semaglutide administered s.c. OD versus liraglutide on glycemic control after 26 weeks of treatment, and 3) to compare semaglutide administered s.c. OD versus placebo and liraglutide on other parameters of efficacy, patient reported outcomes, safety and tolerability after 26 weeks of treatment.

- CHFM primary investigator: Karen Hall, MD
- CHFM total grant: $40,333.26
Expanding an Established Family Medicine Residency by Adding a Rural Track Program

**US Health Resources & Services Administration (HRSA)**
- CHFM primary investigator: Karen Hall, MD
- CHFM total grant: $1,920,000.00

GATR: Gator Athletics TBI Research

**Banyan Biomarkers**
This prospective and observational single-center trial is being conducted with a population of subjects over the age of 18 participating in Men's Football, Women's Soccer, and Women's Lacrosse at the University of Florida (UF), Gainesville. Subjects are being followed for the duration of their collegiate athletic career for the presence or absence of trauma to the head (concussion). In addition to the standard clinical measures that are routinely used in accordance with the UF Athletic Association Concussion Management Policy, subjects are being recruited to participate in research directed procedures involving blood-based biomarkers, and head impact sensor technology. Analysis is being conducted in concert with MRI neuroimaging data that was collected alongside this effort under a separate protocol recruiting and enrolling subjects from the same participating sports teams.

- CHFM primary investigator: James R. Clugston, MD, CAQSM
- CHFM total grant: $322,035.00

Genomic Medicine Implementation: The Personalized Medicine Program

**National Institutes of Health (NIH)**
CYP2D6 poor metabolizers are at increased risk for toxicity with TCA, whereas ultra-rapid metabolizers are at increased risk for treatment failure. We hypothesized that 1) CYP2D6 genotyping will lead to better pain management and control; 2) having CYP2D6 genotype results is useful to inform prescribing decisions for pain medication from the physician's perspective; and 3) genotype results beyond CYP2D6 would be informative for individualizing use of multiple medications prescribed patients in the Family Medicine Clinic.

- CHFM primary investigator: Siegfried Schmidt, MD, PhD
- CHFM total grant: $72,091.23

Hearing Loss and Chronic Disease

**University of Florida CHFM Internal Project Award**
The two aims of this study were to: 1) assess whether self-reported hearing loss is associated with undiagnosed chronic disease: hypertension, hyperlipidemia, diabetes mellitus, and urinary microalbuminuria, and 2) to evaluate control of chronic diseases in the setting of hearing loss: diabetes mellitus, hypertension, hyperlipidemia, and obesity.

- CHFM primary investigator: John Malaty, MD
- CHFM total grant: $10,900.00
HeartMath: Biofeedback Mechanism Used for Physician Wellbeing Monitoring

University of Florida CHFM Internal Project Award
IHM created HeartMath in 1991, a scientifically validated biofeedback tool used to teach the practitioner emotional self-regulation techniques providing both immediate and sustained psychological benefits. The practitioner is connected to an HRV monitor while practicing specific self-regulation techniques to help them achieve cardiac coherence. These regulation techniques, such as ‘mindfulness,’ increase the autonomic nervous system’s parasympathetic tone to meet the stress-driven sympathetic tone, and the practitioner can see themselves reaching cardiac coherence as it occurs on the biofeedback monitor. This study was an open-label, randomized controlled trial with concealed allocation and matching to determine if using HeartMath with daily mindfulness practice is a practical way to improve job satisfaction and performance of primary care staff, therefore improving clinical outcomes.

- CHFM primary investigators: Frank Orlando, MD and Maria Lupi, MD
- CHFM total grant: $7,720

Integration of Serum Biomarkers, MRI, Functional Assessments, and Impact Accelerometer Data to Improve Diagnosis and Management and Predict Prolonged Recovery of Sports Concussions Experienced by UF Collegiate Athletes (AWARE)

Florida High Tech Corridor Council (FHTCC)
Research goal is to more objectively diagnose, manage, and predict recovery of sports concussions using 1) brain imaging using advanced forms of MRI, 2) quantitative measurements of head impacts using the Head Impact Telemetry System in helmeted athletes (football), 3) blood-based concussion biomarker testing, and 4) standard functional assessments of sports concussion currently used in most athletic and clinical settings.

- CHFM primary investigator: James R. Clugston, MD, CAQSM
- CHFM total grant: $133,494.48

MEDication Focused Outpatient Care for Underutilization of Secondary Prevention (MEDFOCUS)

National Institutes of Health (NIH)
To conduct a multi-center, cluster-randomized implementation study utilizing a web-based, centralized cardiovascular risk service, or CVRS, to determine the extent to which the CVRS model will be adopted and implemented in medical offices with large geographic, racial and ethnic diversity. Subjects enrolled at UF will be in the control group, receiving standard care, rather than the CVRS intervention.

- CHFM primary investigator: John G. Gums, PharmD
- CHFM total grant: $83,580.00

Nurse Education, Practice, Quality, and Retention-Interpersonal Collaborative Practice

US Health Resources & Services Administration (HRSA)
- CHFM Co-investigator: Shenary Cotter, MD
- CHFM total grant: $81,357.50
OneFlorida Cancer Control Network

*Florida Department of Health*
Establish a statewide network that will quickly bring the benefits of research in labs and other clinical settings to more than nine million patients in all of Florida’s 67 counties. The network will initially create tobacco cessation programs in doctors’ offices around the state in a coordinated effort to prevent cancers and other cardiovascular diseases related to tobacco use.

- CHFM primary investigator: Peter Carek, MD, MS, CAQSM
- CHFM total grant: $102,531.00

OneFlorida Clinical Research Consortium Phase II

*Patient-Centered Outcomes Research Institute (PCORI)*
- CHFM primary Co-Principal investigator: Peter Carek, MD, MS, CAQSM
- CHFM total grant: $32,900.00

OneFlorida Clinical Research Consortium Phase II

*Patient-Centered Outcomes Research Institute (PCORI)*
- CHFM primary Co-Principal investigator: David Feller, MD
- CHFM total grant: $3,290.00

Pharmacogenomic Evaluation of Antihypertensive Responses

*National Institutes of Health (NIH)*
- CHFM primary investigator: R. Whit Curry Jr., MD
- CHFM total grant: $526,817.79

Pharmacokinetic and Pharmacodynamic (PK-PD) Studies of Cardiovascular Drugs

*US Food and Drug Administration (USFDA)*
The goal of this project is to provide pharmacokinetic and pharmacodynamic data to help the FDA better understand which factors should be considered in bioequivalence studies of metoprolol ER products. We will address our hypotheses with the following specific aims: 1) compare the pharmacokinetics and cardiovascular effects of brand name and generic metoprolol ER products in patients with hypertension; 2) determine the impact of gastric pH variation on the concentration-response relationship with different metoprolol ER products; and 3) examine the effect of CYP2D6 genotype on the pharmacokinetics of different metoprolol ER products.

- CHFM primary investigator: Siegfried Schmidt, MD, PhD
- CHFM total grant: $38,704.50
SaTC-EDU: EAGER: Education Initiative TECH MeD: Transdisciplinary Education for Critical Hacks of Medical Devices

**National Science Foundation (NSF)**

By employing a range of educational strategies, the TECH MeD (Transdisciplinary Education for Critical Hacks of Medical Devices) initiative seeks to broaden the discourse regarding the cybersecurity implications of remotely accessible, implantable medical devices beyond the narrow confines of computer science. Our goal is to educate a broad audience, including undergraduate and graduate-level students from various disciplines, healthcare professionals, patients with implantable medical devices, and the general public about the ethical, legal, social, and technical implications of these remotely accessible technologies.

- CHFM primary investigator: Lauren Solberg, JD, MTS
- CHFM total grant: $35,000.00

Southeastern Conference Visiting Faculty Travel Grant

**University of Florida**

Award to be used for travel for collaboration with University of Georgia and split travel costs with another investigator from the University of Florida.

- CHFM primary investigator: Katherine M. Edenfield, MD, CAQSM
- CHFM total grant: $1,200.00

Sports Concussion and Neuromuscular Function

**National Institute of Health (NIH)**

The long-term goal of this research was to understand the effect of sports concussion on the neuromusculoskeletal system and integrate that knowledge in post-concussion rehabilitation and return-to-play protocols. The overall objective of this study, which is a step toward the long-term goal, was to examine neuromuscular function of the quadriceps following sports concussion. The central hypothesis was that athletes with concussion will have altered quadriceps neuromuscular function at the time of return to play and 30 days later when compared to athletes without concussion. This was a prospective cohort study. Male and female athletes with concussion (n = 34) were matched by age, sex, and pubertal status to athletes without concussion (n = 34). Athletes with concussion were tested within 10 days of physician clearance to return to play and 30 days later. Follow-up testing provided insight into longitudinal changes in neuromuscular function. Athletes without concussion were tested at 2 time points spaced 30 days apart. Functional magnetic resonance imaging (fMRI) were conducted at the first test session only, whereas the interpolated doublet technique and movement analysis was conducted at both test sessions.

- CHFM primary investigator: James R. Clugston, MD, CAQSM
- CHFM total grant: $31,417.00
